The Program in a capsule

Leading, Managing and Coaching by Values (hereafter LMCBV), is based on over 30 years of research. The concept, methodology and tools were developed by Prof. Simon Dolan and his global partners and team. A major component of the program (***Coaching by values)*** has already been recognized as an official school of thought in the field of coaching (**ICF** certificate), and the LMCV has been recognized as an innovative concept by the Spanish Association of Executive Coaches

The training focuses on identifying , measuring and aligning core values with individual success (coaching) as well as with organizational success (leading and managing). The training highlights the new competences needed by leaders to triumph in the new landscape of work. The program blends personal challenges and priorities with that of the firm and the world around us.

The program, actually, is a new blueprint for creating a learning environment in which personal, team, organizational, and environmental factors are assessed, and for which happiness and performance mutually reinforce each other. **Leading, Managing and Coaching by Values** offers a solution to the never-ending challenge of aligning individual values**,** motivation, trust building and culture reengineering with consistent performance and sustainable aspirations.

LMCBV is a hybrid model based on the many bestselling books of Prof. Dolan and his collaborators

TESTIMONIALS

"These two days not only gave me a model I believe in, but it transformed me, reminding me to get back to living my own values"

Dr. Bonnie Richley,
Assistant Vice President - Case Western Reserve University Ohio, Cleveland OH. U.S.A.
Co-author Managing by Values

"Very interesting, highly professional and thoroughly enjoyable. I have learned a lot about both coaching from Simon and from the other participants in the room. What I would say about what impressed me the most about the program is the other people, the other attendees and their experiences, I am going back to Australia with a lot more confidence to coach in the future"

Dr Philip R Harrel
Executive Director, New England Management Development Institute, Australia

The concept, the methodology and the original innovative tools were hailed by many experts as genius, in the sense that a complex phenomenon becomes simple, clear and highly applicable; we will provide managers, leaders and Coaches the tools to succeed in an ever increasing complex world.
